

KOGI

Independent Worker Operating System

Platform Tools

System Design Document

v1.0 · Kogi Platform · March 2026

1. Overview

Kogi Platform Tools are purpose-built, AI-assisted utilities that help independent workers, creatives, professionals, and organizations generate, design, manage, and publish the documents, content, and assets they need to operate and grow. Unlike generic third-party tools, Kogi Tools are deeply integrated with the platform's Portfolio System, kogi-bank, Marketplace, Community, and Oba AI layer — meaning outputs are automatically saved as versioned Portfolio Artifacts, linked to relevant work items, and reusable across every module.

This document defines the full tools catalog: starting with the flagship Resume & Work-Portfolio Highlights Builder, followed by essential tools across identity, business development, financial, work planning, community, and AI assistance categories.

Tool ID	Tool Name	Category
T-01	Resume & Work-Portfolio Highlights Builder	Identity & Presentation
T-02	Bio & Elevator Pitch Generator	Identity & Presentation
T-03	Press Kit Builder	Identity & Presentation
T-04	Brand Kit & Social Media Kit Builder	Identity & Presentation
T-05	Proposal & Pitch Deck Generator	Business Development
T-06	Rate & Pricing Calculator	Business Development
T-07	Scope of Work (SOW) Builder	Business Development
T-08	Client Onboarding Toolkit	Business Development
T-09	Contract Template Generator	Financial & Legal
T-10	Invoice & Payment Builder	Financial & Legal
T-11	Tax & Income Estimator	Financial & Legal
T-12	Grant Application Builder	Financial & Legal
T-13	Project Brief & Charter Generator	Work Planning
T-14	OKR & Goal-Setting Tool	Work Planning
T-15	Retrospective & Review Facilitator	Work Planning
T-16	Cooperative Charter Builder	Community & Orgs
T-17	Initiative & Campaign Planner	Community & Orgs
T-18	Equity Crowdfunding Campaign Builder	Community & Orgs
T-19	Skills Mapper & Gap Analyzer	AI Tools (Oba)
T-20	Career Path & Rate Benchmarking Advisor	AI Tools (Oba)
T-21	Content Repurposer & Publishing Kit	AI Tools (Oba)
T-22	Opportunity Matcher & Pitch Personalizer	AI Tools (Oba)

1.1 Shared Tool Architecture

All Kogi Tools share a common architecture and output pipeline ensuring that every tool output is a first-class platform object.

Layer	Description
Input Layer	Form-driven or conversational (Oba-mediated) data collection; pre-populated from Portfolio, Profile, and kogi-bank data where available
Generation Engine	AI generation via Oba (Claude-powered); template-based composition; rule-based data transformation
Output Layer	Produces: PDF export · DOCX export · Portfolio Artifact · Shareable link · Direct publish to Profile / Marketplace / Community
Storage Layer	All outputs saved as versioned Portfolio Artifacts; linked to relevant Portfolio Components; full history retained
Analytics	View counts, share rates, conversion tracking (e.g., proposal-to-close), download events tracked per artifact
Personalization	PersonalizationEngine tunes tone, format, and content emphasis based on user Persona, work history, and target audience context

2. Identity & Presentation Tools

T-01

Resume & Work-Portfolio Highlights Builder

Generate tailored, AI-enhanced resumes and portfolio highlight decks from your Kogi work history

Purpose

The Resume & Work-Portfolio Highlights Builder is Kogi's flagship self-presentation tool. It transforms a user's live platform data — their portfolio components, completed projects, gigs, skills, contributions, endorsements, and analytics — into professionally formatted, targeted, and AI-refined resume documents and portfolio highlight packages. Every output is context-aware: the tool generates different versions for different audiences (employers, clients, investors, grant committees, collaborators) from the same underlying work record.

Core Capabilities

Capability	Description
Auto-population from Portfolio	Imports projects, programs, roles, contributions, skills, endorsements, certifications, and timeline data directly from the user's Kogi portfolio — no manual re-entry
Multi-format resume generation	Produces: Chronological resume · Functional resume · Hybrid resume · Portfolio-first resume · Executive summary · One-pager bio · CV (academic/extended)
Portfolio highlights deck	Generates a visual project highlights deck: 1–3 pages per featured project with outcome metrics, role summary, tools used, and impact statement — exportable as PDF or slide deck
Audience targeting	User specifies target (employer, client, investor, grant committee, collaborator); Oba adjusts tone, vocabulary, emphasis, and which projects to feature
AI narrative generation	Oba drafts achievement statements using the STAR format (Situation, Task, Action, Result); quantifies impact where analytics data is available
Skills & endorsements import	Pulls skills from profile, endorsements from community, certifications from professional development account, and platform-verified activity badges
Version management	Unlimited named versions (e.g., 'Tech Lead Resume', 'Creative Freelancer', 'Grant CV'); each version is a separate Portfolio Artifact
ATS optimization	Analyzes target job description (paste or URL); optimizes keyword density and formatting for Applicant Tracking System compatibility
Real-time analytics integration	Where portfolio analytics are available, auto-inserts quantified results: 'Led 3 campaigns generating 42% audience growth'; sourced from AnalyticsEngine
Cover letter companion	Generates a contextually matched cover letter or client outreach message synchronized with the resume version

Capability	Description
Export formats	PDF (print-ready) · DOCX (editable) · Plain text (ATS-safe) · JSON (machine-readable) · Shareable link (live portfolio page)
Template library	30+ professionally designed resume and highlights deck templates organized by industry, persona, and purpose; community-contributed templates available

Workflow

Step	Action
1. Source Selection	User selects which portfolio items, projects, roles, and time ranges to include; smart suggestions from Oba based on most recent and highest-engagement items
2. Audience Config	Set target audience type, role or opportunity title, desired tone (professional, creative, executive, technical), and output format
3. Content Review	Oba presents a structured draft with editable sections; user approves, edits, or prompts Oba to revise specific achievement statements or descriptions
4. ATS / Keyword Pass	Optional: paste target job description or opportunity brief; Oba runs keyword gap analysis and suggests additions without compromising authenticity
5. Design Selection	Choose template; customize accent color, font weight, section order; preview in real time
6. Generate Outputs	One-click production of all selected output formats; cover letter generated in parallel
7. Save & Publish	Saved as Portfolio Artifact; optionally published to public profile, shared via link, or attached to a Marketplace application or grant proposal
8. Version Update	When new portfolio items are added or analytics refresh, Oba notifies: 'Your Tech Lead resume can be updated with 2 new projects'

Data Sources (Auto-Populated Fields)

Resume Section	Kogi Data Source	Auto-populated Content
Work Experience	Portfolio programs + projects	Role title, org name, dates, scope description, team size, outcomes, links
Skills	Profile skills + contribution types	Skill names, proficiency levels, platform usage frequency, peer endorsements
Achievements & Impact	Portfolio analytics + project outcomes	Quantified metrics: growth %, revenue generated, audience size, completion rates
Certifications	Professional development account	Certification name, issuer, date, credential ID, expiry
Education	Profile education fields	Institution, degree/program, dates, relevant coursework, honors

Resume Section	Kogi Data Source	Auto-populated Content
Volunteering / Contrib	Community contributions + initiatives	Initiative name, role, contribution type, org, dates, impact summary
Portfolio Highlights	Portfolio artifacts + project pages	Project name, role, thumbnail, outcome, tools, external link
Endorsements	Community endorsements + reviews	Endorser name, relationship, skill endorsed, quote (with permission)
Publications	Content artifacts + community posts	Title, platform, date, engagement metrics, external link
Awards & Recognition	Portfolio badges + community recognition	Award name, issuer, date, context

AI Generation — Oba Integration

- Achievement rewriting: converts raw task descriptions into STAR-format impact statements
- Tone calibration: adjusts formality, confidence level, and vocabulary register per audience
- Gap detection: identifies missing resume sections and prompts the user to fill them from portfolio or manually
- Tailoring suggestions: for each target opportunity, Oba recommends which projects to lead with and which to omit
- Freshness alerts: notifies when a saved resume version is stale relative to new portfolio activity
- Duplicate detection: flags repeated phrases, overused words, and inconsistent date formats
- Comparison mode: side-by-side two resume versions with diff highlighting

Output Artifacts

Output	Format & Destination
Tailored Resume	PDF · DOCX · Plain TXT → saved as Portfolio Artifact; shareable link; attaches to Marketplace applications
Portfolio Highlights Deck	PDF · PPTX (slide deck) → saved as Portfolio Artifact; embeds in public profile page
Cover Letter	PDF · DOCX · plain email text → saved as Portfolio Artifact; synced to CRM lead record
Skills Summary	JSON · plain text → API-accessible; used by MatchEngine for gig and job matching
Executive Bio	Plain text · PDF → reusable across press kit, conference speaker profiles, social bios
ATS-Optimized Plain Text	TXT → specifically formatted for copy-paste into online application systems

T-02**Bio & Elevator Pitch Generator***Craft compelling professional bios and spoken / written pitch scripts in seconds***Purpose**

Generates multiple-length professional bios (one-liner, 50-word, 150-word, full-page) and structured elevator pitch scripts from profile, portfolio, and persona data. Each bio variant is optimized for a specific context: speaking engagements, social media profiles, press releases, platform profiles, grant applications, and podcast introductions.

Feature	Description
Multi-length bio suite	Generates: one-liner · tweet bio (160 chars) · short bio (50w) · medium bio (150w) · long bio (500w) · full speaker bio (1 page)
Context variants	Produces different versions for: LinkedIn · Kogi profile · speaking bio · grant committee · press release · conference website · email signature
Third-person / first-person	Toggle between narrative modes; Oba adapts naturally
Elevator pitch script	Structured 30-second, 60-second, and 2-minute pitch scripts with opening hook, value proposition, proof point, and call-to-action
Persona-aware tone	Detects active persona (Creative, Professional, Activist, etc.) and adjusts emphasis — e.g., leading with impact for Activists, with craft for Creatives
Audience targeting	Specify audience: clients · investors · collaborators · grant committees · general public — Oba adjusts vocabulary and emphasis
Update triggers	Oba alerts when key portfolio achievements should refresh the bio

T-03

Press Kit Builder

Assemble a complete, publication-ready press kit in one workflow

Purpose

Produces a structured, shareable press kit package for individuals, projects, or organizations launching a release, event, campaign, or funding round. Outputs are hosted as a live link and exported as a downloadable ZIP.

Component	Description
Press Release	AI-drafted announcement in AP Style; customizable headline, quote blocks, and boilerplate; PDF + plain text outputs
Fact Sheet	Bullet-format one-pager: key stats, milestones, team, and contact info; auto-populated from portfolio analytics
Media Bio	Full 1-page bio formatted for press use; third-person; includes headshot placement
Project / Product Overview	2–3 page narrative overview of the work being announced; links to portfolio items
Media Assets Package	Approved hi-res images, logos, brand marks — zipped; hosted media asset gallery with download links
Notable Quotes	Curated quote bank: from the creator/founder, partners, clients, and community endorsers
Coverage Links	Running list of press coverage; auto-updated when new links are added
Contact Block	Booking, press, and partnership contacts; links to Kogi CRM intake form
Live Hosted Kit	Shareable URL with password-optional access; analytics on who viewed and which assets downloaded

T-04

Brand Kit & Social Media Kit Builder

Define, generate, and distribute a consistent visual and verbal brand identity

Purpose

Helps independent workers and organizations establish and document their brand identity — covering visual elements, voice guidelines, and ready-to-use social media assets. Outputs are stored as a Brand Kit Portfolio Artifact reused across all platform publishing surfaces.

Component	Description
Brand Voice Guide	Tone, vocabulary, and style guidelines; do/don't examples; Oba-drafted from persona and work history signals
Visual Identity Spec	Color palette (hex/RGB/CMYK), typography pairings, logo usage rules, iconography notes
Profile Asset Set	Platform-formatted profile images and banners for Kogi, LinkedIn, Instagram, X, YouTube — correct dimensions, auto-exported
Social Media Templates	Customizable post templates for announcements, project highlights, quotes, milestones — 9:16, 1:1, 16:9 formats
Content Calendar Starter	AI-generated 30-day content plan aligned to brand voice, portfolio launches, and initiative timelines
Bio Consistency Audit	Checks all profile bios across connected platforms for tone and information consistency
Hashtag Strategy	Recommended primary, secondary, and community hashtags based on persona, industry, and platform analytics
Brand Kit Export	ZIP package: logo files, color swatches, font files, template files, and brand guide PDF

3. Business Development Tools

T-05

Proposal & Pitch Deck Generator

Create winning client proposals and investor pitch decks from your portfolio

Purpose

Generates structured, professional proposals and pitch decks tailored to a specific opportunity — client project, partnership, investor round, or grant. Pre-populates from the user's portfolio data, past project outcomes, team profiles, and kogi-bank financial data. Outputs integrate with the CRM pipeline and contract workflow.

Feature	Description
Proposal types	Client project proposal · Partnership proposal · Grant proposal · Event booking proposal · Retainer proposal · Joint venture proposal
Pitch deck types	Investor pitch deck (12-slide) · Community pitch · Cooperative pitch · Product launch deck · Event pitch · Program pitch
Smart section generation	Oba drafts: executive summary, problem statement, proposed solution, scope, deliverables, timeline, team bios, past work proof, pricing, and next steps
Portfolio proof insertion	Auto-selects most relevant past projects and outcome metrics as credibility evidence; links live to portfolio artifacts
Pricing integration	Pulls from Rate Calculator (T-06) and past invoice data (kogi-bank) to propose competitive, well-anchored pricing
Client-specific tailoring	Input client/investor name and context; Oba personalizes the narrative, adjusts vocabulary, and mirrors the opportunity language
Deck design	Professionally designed slide templates; brand kit integration for colors and fonts; drag-reorder sections
Send and track	Share via Kogi link; tracks opens, time-spent-per-slide, and downloads; Oba alerts on engagement signals
CRM sync	Proposal auto-linked to CRM deal record; status updates on open, viewed, and accepted events
Accept flow	Proposal acceptance triggers contract generation (T-09) and deposit invoice (T-10) automatically

T-06

Rate & Pricing Calculator

Set, justify, and communicate your rates with confidence and market data

Purpose

A data-driven pricing tool that helps independent workers determine market-appropriate rates, build pricing packages, and communicate pricing to clients. Combines platform income data, market benchmarks, expense analysis, and goal-based income planning.

Feature	Description
Hourly / day rate calculator	Income goal input → expense baseline → target margin → recommended hourly and day rate with utilization assumptions
Project pricing builder	Time estimate + rate + expenses + risk buffer + profit margin → flat project fee with itemized breakdown
Package builder	Design tiered service packages (Starter / Standard / Premium) with feature lists and price points; embed on profile
Market benchmarking	MatchEngine pulls market rate ranges from anonymized platform data by skill category, persona, experience level, and geography
Retainer calculator	Monthly retained hours + scope → retainer price with discount modeling; payment schedule options
Rate increase modeler	Simulates impact of rate increases on bookings, revenue, and client mix; Oba recommends timing and communication approach
Competitive positioning	Positions user's rates relative to platform benchmarks: budget / mid-market / premium / luxury tiers
Rate card generator	Produces a formatted, shareable Rate Card PDF for client distribution; versioned

T-07**Scope of Work (SOW) Builder***Define, document, and lock project scope to prevent creep and protect your time***Purpose**

Guides the user through a structured scope definition workflow producing a signed SOW document that integrates with contract generation and project backlog creation.

Feature	Description
Guided scope interview	Oba asks structured questions: deliverables, exclusions, assumptions, acceptance criteria, revision rounds, communication expectations
SOW document generation	Produces: project overview, objectives, deliverables list, out-of-scope items, assumptions, dependencies, timeline, revision policy
Change order workflow	Built-in change order template; client signs digitally; kogi-bank generates supplemental invoice automatically
Backlog seeding	On approval, SOW deliverables optionally seed the project backlog in Work Management as epics and stories
Milestone schedule	Auto-generates milestone payment schedule from SOW timeline; feeds kogi-bank invoice queue
Conflict detection	Oba flags vague deliverables, missing acceptance criteria, and undefined revision limits before the SOW is sent

T-08**Client Onboarding Toolkit***Deliver a polished, automated onboarding experience for every new client***Purpose**

Packages all the materials, communications, and workflow triggers a worker needs to onboard a new client professionally. Connects to CRM, contracts, invoicing, and project setup in a single guided flow.

Component	Description
Welcome package	Customizable welcome email/document: intro, working style, communication norms, tools, and what to expect
Onboarding questionnaire	Client intake form: goals, constraints, preferences, assets needed, key contacts — responses saved to CRM record
Contract + SOW bundle	Pre-configured contract (T-09) + SOW (T-07) sent as a single e-signature package
Deposit invoice	Automatically triggered deposit invoice (T-10) sent on contract signature
Shared workspace setup	Creates a client-specific portfolio space with shared documents, project board, and communication room

Component	Description
Kickoff meeting template	Structured kickoff agenda, pre-read, and meeting notes template; outcome actions auto-create backlog items
Timeline share	Client-facing project timeline with milestone visibility; updates automatically as work progresses
Automation triggers	Sequence: contract signed → deposit invoice → welcome email → shared workspace → kickoff booking link

4. Financial & Legal Tools

T-09

Contract Template Generator

Generate, customize, and send legally structured contracts from your work history context

Purpose

Produces customizable contract documents for every common independent worker engagement type. Contracts integrate with the e-signature workflow, kogi-bank invoice system, and Portfolio EventLog for full audit history.

Contract Type	Key Clauses Auto-populated
Freelance Services Agreement	Scope, deliverables, payment terms, revision rounds, IP ownership, kill fee, confidentiality, governing law
Consulting Agreement	Retainer terms, statement of work attachment, expense reimbursement, non-compete (optional), IP ownership
Independent Contractor Agreement	Contractor status, project scope, payment schedule, equipment/tools, termination, indemnification
Creative Services Agreement	Licensing terms, usage rights, credit requirements, exclusivity window, deliverable specs
Partnership Agreement	Roles and responsibilities, revenue share formula, decision-making process, IP ownership, exit terms
Revenue Share Agreement	Revenue definition, calculation method, payment cadence, audit rights, term and termination
NDA / Confidentiality	Scope of confidential info, obligations, exclusions, term, remedies
Service Level Agreement (SLA)	Response times, uptime commitments, escalation path, remedies for breach
Booking / Event Contract	Event details, deliverables, deposit schedule, cancellation policy, force majeure, overtime terms
License Agreement	Scope of license, exclusivity, territory, royalty terms, sublicensing, IP warranties

Feature	Description
AI clause drafting	Oba suggests appropriate clauses based on engagement type, platform usage history, and past contract patterns
Custom clauses	Free-text custom clause editor with Oba review for legal clarity and consistency
Variable fields	Auto-populated from booking details, client CRM record, SOW, and kogi-bank account data
E-signature workflow	Send via integrated e-signature (DocuSign / HelloSign); signed status tracked in Portfolio System

Feature	Description
Version control	All contract revisions versioned; full audit trail; counterparty change requests tracked
Template library	Personal library of saved and modified templates; community-contributed clause library
Jurisdiction guidance	Oba notes when clauses may vary significantly by jurisdiction; user consults qualified legal counsel for final review

T-10**Invoice & Payment Builder**

Create, send, and track professional invoices with automated reminders and payment routing

Purpose

A full-cycle invoice management tool integrated with kogi-bank ledgers, booking and contract data, and client CRM records. Automates the full billing lifecycle from creation to payment confirmation.

Feature	Description
Invoice types	Deposit · Progress · Milestone · Final · Recurring · Retainer · Credit Note · Expense Reimbursement
Auto-population	Pulls client info from CRM, line items from SOW/contract, payment terms from agreement, tax rate from location data
Line item templates	Saved line item libraries: service rates, package prices, expense categories — reusable across invoices
Payment schedules	Multi-payment schedule builder; automatic staged invoice generation on milestone completion
Recurring billing	Subscription/retainer billing: auto-generates and sends invoices on configured cadence
Payment tracking	Real-time payment status: sent → viewed → partial → paid → overdue; kogi-bank reconciliation
Automated reminders	Configurable sequences: 3-day pre-due reminder · due-date reminder · 3-day late · 7-day late · final notice
Multiple payment methods	kogi-bank transfer · ACH · card · international wire · platform credits; QR code payment option
Tax handling	GST/VAT · sales tax · self-employment tax estimates; itemized on invoice; links to Tax Estimator (T-11)
Late fees	Configurable late fee rules auto-applied and noted on overdue invoices per contract terms
Analytics	Average days-to-pay by client; revenue by month; outstanding AR aging; invoice conversion rate

T-11**Tax & Income Estimator**

Stay ahead of tax obligations with real-time income tracking and self-employment tax modeling

Purpose

A tax planning and income modeling tool designed specifically for independent workers, gig workers, and self-employed individuals. Connects to kogi-bank income and expense data to provide running tax liability estimates, quarterly payment reminders, and deductible expense tracking.

Feature	Description
Self-employment tax estimate	Running estimated SE tax liability based on YTD net income from kogi-bank; updated on each payment received
Quarterly payment reminder	Alerts for IRS/HMRC estimated tax payment due dates with suggested payment amounts based on YTD actuals
Deduction tracker	Categorizes and tracks deductible business expenses: home office, equipment, software, travel, professional development
Income scenario modeling	Models annual tax impact of different income levels; useful for setting rates and evaluating gig acceptance
Retirement contribution impact	Shows how SEP-IRA or Solo 401k contributions reduce taxable income; links to kogi-bank retirement accounts
Health insurance deduction	Tracks self-employed health insurance premiums as above-the-line deduction; linked to portable benefits accounts
Multi-state / multi-platform	Aggregates income from multiple gig platforms; estimates state tax obligations for workers in multiple states
Year-end summary	Generates a summary of income, deductions, and estimated tax for accountant or tax software handoff; exportable
W-9 / 1099 tracker	Tracks clients and platforms required to issue 1099s; alerts when thresholds are crossed (\$600+ US)

T-12

Grant Application Builder

Discover matching grants and build compelling applications backed by portfolio evidence

Purpose

Combines the kogi-bank GrantEngine with an AI-assisted application writing workflow, portfolio evidence assembly, and impact reporting. Designed for individuals, collectives, cooperatives, and community organizations seeking government, foundation, platform, and community grants.

Feature	Description
Grant discovery	GrantEngine surfaces matching grants from registry based on eligibility profile, portfolio content, entity type, and past award history
Eligibility check	Structured pre-screen: work type, entity, location, revenue, sector — Oba confirms or disqualifies before the user invests time
Application narrative writer	Oba drafts responses to common grant questions: project description, community impact, organizational capacity, budget justification
Portfolio evidence assembly	Auto-attaches relevant portfolio artifacts as supporting documentation: project reports, financial statements, community engagement metrics
Budget builder	Structured grant budget template with expense categories, justifications, and matching funds tracking
Impact statement generator	Translates portfolio analytics into a compelling impact narrative: reach, outcomes, community served, measurable change
Reviewer persona mode	Oba role-plays grant reviewer, scores the application draft, and flags weak sections before submission
Deadline management	Grant deadlines added to Timeline as milestones; task checklist auto-generated for each application
Application tracker	Lifecycle tracking: Drafting → Submitted → Under Review → Awarded Rejected → Reporting
Impact report generator	Post-award: auto-generates progress and final impact reports from portfolio and kogi-bank data on schedule

5. Work Planning Tools

T-13

Project Brief & Charter Generator

Launch every project with clarity — scope, goals, team, and success criteria defined from day one

Purpose

A guided tool for generating a complete project brief or formal project charter from a set of structured inputs. Output documents are saved as Portfolio Artifacts linked to the project and seed the Work Management System with initial epics, milestones, and a backlog.

Section Generated	Description
Executive Summary	1-paragraph project overview for stakeholder communication
Problem / Opportunity	Root cause or opportunity statement; Oba frames using standard problem framing templates
Goals & Success Criteria	SMART goals with measurable success criteria; linked to OKR tool (T-14)
Scope & Out of Scope	Defined inclusions and explicit exclusions; prevents scope creep from project start
Stakeholders & Roles	RACI matrix: Responsible, Accountable, Consulted, Informed — populated from team and CRM records
Timeline & Milestones	High-level phased timeline; milestones added to Work Management and Gantt automatically
Budget Envelope	Initial budget allocation; linked to kogi-bank project account
Risks & Mitigation	Structured risk register: risk, likelihood, impact, owner, mitigation plan
Dependencies & Assumptions	External dependencies and working assumptions that could invalidate the plan
Communication Plan	Stakeholder update cadence, channels, and escalation path
Approval & Sign-off	Digital sign-off from project sponsor or key stakeholders; audit trail

T-14

OKR & Goal-Setting Tool

Set meaningful objectives, define measurable key results, and track progress with Oba coaching

Purpose

A structured OKR (Objectives and Key Results) authoring, alignment, and tracking tool. Works at individual, team, organization, and federation levels. Integrates with Work Management analytics and Portfolio System for auto-computed key result progress.

Feature	Description
OKR authoring wizard	Guided Oba interview: define aspiration (Objective), identify 3–5 measurable outcomes (Key Results), set confidence levels and scoring scales
Quality check	Oba reviews drafts: flags unmeasurable KRs, too-broad objectives, and low-ambition targets before finalizing
Hierarchy alignment	Individual OKRs align to team → org → platform initiative OKRs; parent-child visualization
Auto-progress updates	Key Results linked to Portfolio analytics data auto-update progress: completed stories, revenue generated, community growth
Weekly check-ins	Structured 5-minute weekly check-in: confidence update, blocker flag, key result progress; generates momentum score
Scoring & grading	0.0–1.0 OKR scoring at period end; auto-computed from KR actuals; Oba drafts retrospective commentary
Cascade view	Full hierarchy visualization: platform initiatives → org OKRs → team OKRs → individual OKRs
OKR history	All past OKR periods archived; trend analysis; improvement areas surfaced by Oba

T-15**Retrospective & Review Facilitator***Run structured, productive retrospectives and reviews with any team — sync or async***Purpose**

A facilitation tool for running structured retrospectives, sprint reviews, project post-mortems, and quarterly reviews. Supports both real-time facilitated sessions and asynchronous collection workflows. Outputs are Portfolio Artifacts with action items auto-seeded into the backlog.

Feature	Description
Format library	Pre-built formats: 4Ls (Liked, Learned, Lacked, Longed For) · Start/Stop/Continue · Mad/Sad/Glad · Starfish · Timeline Retrospective · Post-Mortem
Async collection	Team members submit responses before the session; Oba clusters and themes responses; facilitator reviews before the meeting
Live facilitation mode	Real-time shared board; dot-voting; timer-controlled rounds; facilitator controls progression
Oba synthesis	After collection, Oba produces a draft narrative summary: top themes, key wins, top concerns, and suggested action items
Action items	Agreed actions assigned, due-dated, and directly seeded into project backlog or personal TODO list
Trend analysis	Retro history compared across sprints or quarters; recurring themes flagged by Oba
Sprint / PI review	Structured sprint review agenda: demo items, velocity review, goal attainment, stakeholder feedback, next sprint preview
Report generation	Formatted retrospective report: Portfolio Artifact saved; shareable with stakeholders

6. Community & Organization Tools

T-16

Cooperative Charter Builder

Establish your cooperative, collective, or autonomous org with a governing charter and operating agreement

Purpose

A structured document generation tool for founding organizations on the Kogi platform. Produces a governance charter, operating agreement, membership policy, and initial treasury configuration. Designed for cooperatives, collectives, federations, councils, and autonomous organizations.

Component Generated	Description
Founding Charter	Mission, vision, values, organizational type, founding members, purpose statement, and scope of activity
Membership Policy	Membership criteria, admission process, dues/contributions, rights, responsibilities, and exit procedures
Governance Rules	Decision-making model: vote thresholds, quorum, proposal lifecycle, tie-breaking, emergency procedures
Revenue Distribution Policy	Formula: hours contributed, equity share, governance participation, seniority weighting — configurable per org type
Financial Controls	Multi-sig treasury configuration: number of signers, threshold amounts, spending categories, audit schedule
Operating Agreement	Formal operating document for entity registration (LLC/Corp/Trust); state-specific guidance notes
Bylaws	Structured bylaws document for formal organization types; amendment procedures included
Dissolution Protocol	Asset distribution plan, wind-down procedure, member notification requirements on org dissolution

T-17

Initiative & Campaign Planner

Design and launch a coordinated community initiative with a clear plan, team, and timeline

Purpose

A structured planning tool for launching platform initiatives — portable benefits programs, community lending pools, shared portfolio campaigns, grant initiatives, advocacy campaigns, and crowdresourcing efforts. Outputs a full initiative plan with team assignments, timeline, budget, and governance setup.

Feature	Description
Initiative types	Portable Benefits · Grants · Microfinancing · Group Economics · Equity Crowdfunding · Crowdresourcing · Advocacy · Shared Portfolio
Guided planning interview	Oba interviews: initiative goal, target community, resources needed, governance model, success criteria, and risk factors
Plan document generation	Produces: initiative overview, problem statement, proposed impact, team roles, timeline, budget, communication plan, and KPIs
Team assembly	Invite co-organizers, stewards, and contributors; roles assigned with governance permissions configured
Governance setup	Configures approval thresholds, steward committee, and voting rules for the initiative space
Milestone timeline	Auto-generates milestone schedule from planning inputs; syncs to Work Management timelines
Budget template	Initiative budget: funding sources (grants, member contributions, donations), planned expenses, and contingency
Launch checklist	Oba generates a tailored pre-launch checklist based on initiative type; items seed project backlog

T-18**Equity Crowdfunding Campaign Builder**

Design and launch a Reg CF or revenue-share capital raise from your portfolio and community

Purpose

An end-to-end campaign design and launch tool for equity crowdfunding on the Kogi platform. Covers campaign type selection, offering document drafting, cap table setup, escrow configuration, investor communication, and Reg CF compliance checks.

Feature	Description
Campaign type selector	Equity (Reg CF / Reg A+) · Revenue Share · SAFE Note · Convertible Note · Donation · Reward-based — with plain-language explanations
Offering summary generator	Oba drafts: business overview, use of funds, risk factors, team bios, financial summary, and investor return model
Valuation input	Cap table modeling: pre-money valuation, raise target, equity offered, post-money dilution visualization
Campaign page builder	Visual campaign page: video embed, team profiles, portfolio highlights, financials, FAQ, and investor updates
Investor communication kit	Templates: campaign announcement, update emails, milestone notifications, close announcement
Reg CF compliance check	CrowdfundingEngine checks: raise limit, investor accreditation requirements, disclosure completeness — flags before launch
Escrow setup	Campaign escrow account configured in kogi-bank; auto-refund on failure; milestone-disbursement on success
Cap table integration	Investor equity positions tracked in kogi-bank Equity Accounts; vesting enforced; dilution computed on new rounds
Post-campaign reporting	Automated investor update cadence; financial performance reports; distribution computation by Revenue Share Engine

7. AI Tools (Oba-Powered)

The following tools are primarily AI-driven, powered by Oba — Kogi's platform AI assistant. They operate on live platform data and are deeply personalized to the user's portfolio, persona, work history, and goals.

T-19

Skills Mapper & Gap Analyzer

Visualize your full skill profile, identify gaps, and build a personalized development plan

Purpose

Constructs a comprehensive, evidence-backed skills map from the user's portfolio contributions, gig work history, certifications, endorsements, and self-assessments. Compares the skill profile against target roles, opportunities, and market benchmarks to surface actionable gaps with concrete development paths.

Feature	Description
Skill profile assembly	Aggregates skills from: profile declarations, project contributions, gig types claimed, certifications, endorsements, and MatchEngine usage signals
Proficiency scoring	Each skill scored across: frequency of use · peer endorsement count · portfolio evidence strength · recency of application
Skill cluster map	Visual cluster diagram grouping skills into domains (Technical, Creative, Business, Interpersonal, Domain-Specific)
Gap analysis	User specifies a target role, gig type, or career goal; Oba identifies the skill gaps between current profile and target requirement
Market demand overlay	MatchEngine surfaces which skills are most in-demand on the Kogi Marketplace based on current gig and job listings
Development plan generator	For each gap, Oba recommends: platform resources, certifications, courses, community mentors, practice projects, and suggested timeframe
Professional development account link	Recommended learning paths linked to kogi-bank Professional Development Account for funding
Progress tracking	Skills gained through completed projects and certifications auto-update the map; progress toward development plan milestones tracked

T-20

Career Path & Rate Benchmarking Advisor

Understand where you are, where you can go, and what your work is worth in the market

Purpose

An AI-powered career intelligence tool that analyzes the user's work history, income trajectory, skill profile, and market signals to provide personalized career path scenarios, income benchmarks, and strategic positioning advice.

Feature	Description
Career trajectory analysis	Oba analyzes portfolio history and identifies: current career stage, progression velocity, specialization depth, and breadth of experience
Path scenario generator	Produces 3 alternative career path scenarios based on current profile: depth path (specialist), breadth path (generalist), or leadership path
Market rate benchmarking	Anonymized platform income data by: skill set, persona type, experience level, geography, engagement type (retainer/project/gig)
Income gap analysis	Compares current income trajectory against market benchmark; Oba identifies what changes in positioning, rates, or services close the gap
Rate increase readiness	Assesses whether portfolio evidence, endorsements, and skill depth support a rate increase — and by how much
Positioning recommendations	Oba recommends: how to niche or expand, which new service types to add, which communities or markets to enter
Peer comparison (anonymized)	How the user's metrics compare to similar workers on the platform — portfolio size, booking rate, income, endorsements
90-day action plan	Concrete, prioritized 90-day recommendations with tasks that seed directly into work management backlog

T-21**Content Repurposer & Publishing Kit***Transform one piece of work into a full content strategy across every channel and format***Purpose**

Takes any portfolio artifact — a completed project, report, case study, talk, video, or document — and generates a full suite of derivative content assets formatted for every relevant distribution channel. Eliminates the gap between doing great work and communicating it effectively.

Input Type	Derivative Outputs Generated
Completed project / case study	LinkedIn article · Twitter/X thread · Instagram carousel captions · Portfolio case study page · Email newsletter feature · Press release · Talk abstract
Project report / research	Executive summary · Blog post · Data visualization captions · Slide deck summary · Community post · Podcast talking points
Video / talk / presentation	Transcript clean-up · Chapter summaries · Quote pull cards · Blog post · Short-form clips script · Newsletter recap
Client testimonial / review	Quote card (social image spec) · Website testimonial copy · Proposal proof block · Portfolio highlight callout
Portfolio analytics summary	Impact statement (resume use) · Investor update · Community progress post · Grant report input · Annual review narrative
New gig / service listing	Service page copy · Social announcement · Email pitch · DM outreach script · Rate card line item

Feature	Description
Channel optimization	Formats output for: Kogi profile · LinkedIn · X · Instagram · Email · YouTube description · Podcast notes · Press release
Tone variants	For each output, generates 2–3 tone variants: professional, casual/conversational, and high-energy/promotional
Hashtag generation	Platform and channel-optimized hashtag sets per piece of content
Scheduling suggestions	Oba recommends optimal posting times per channel based on audience activity data
Content calendar sync	Published and scheduled items added to Brand Kit content calendar (T-04)
Analytics loop	Tracks engagement per published piece; Oba identifies top-performing content types and recommends doubling down

T-22**Opportunity Matcher & Pitch Personalizer***Get matched to the right opportunities and pitch them with surgical precision***Purpose**

Combines the MatchEngine's opportunity discovery with AI-assisted, opportunity-specific pitch personalization. The tool continuously surfaces relevant gigs, jobs, grants, partnerships, and investment opportunities, then helps the user craft a tailored pitch response for each one in minutes.

Feature	Description
Opportunity feed	MatchEngine delivers a personalized feed of: gigs, consulting opportunities, grants, partnership invitations, collaborative projects, and investment asks — ranked by fit score
Fit score breakdown	For each opportunity: why it's a match (skills, history, persona, community alignment), what to lead with, and potential concerns
One-click pitch generation	User selects an opportunity; Oba generates a tailored pitch drawing from portfolio, skills, past outcomes, and the opportunity brief
Pitch variants	Generates: short (DM/email pitch) · medium (proposal attachment) · full (proposal document via T-05) — user picks context
Personalization signals	Oba reads the opportunity description for language, tone, priorities, and requirements, then mirrors them in the pitch without losing authenticity
Follow-up templates	If no response after N days, Oba generates a contextual follow-up message; links to CRM pipeline (T-08)
Rejection debrief	If an opportunity is lost, Oba offers a brief debrief: what the portfolio evidence suggests, what could strengthen future applications
Pipeline integration	All pitched opportunities tracked in CRM pipeline; status updates and next actions managed from one view

8. Shared Tool Infrastructure

8.1 Tool Output Pipeline

Every tool in the Kogi Platform Tools catalog produces outputs through a unified pipeline ensuring consistent storage, access, and analytics.

Pipeline Stage	Description
Generation	AI-assisted or template-driven content assembly; inputs validated; Oba review pass for quality and completeness
Preview	WYSIWYG preview with real-time edits; mobile and print preview available; accessibility checks
Artifact Creation	Output saved as a versioned Portfolio Artifact with resource_type, content hash, and generation metadata
Linking	Artifact bi-directionally linked to: source portfolio items, CRM records, project backlogs, kogi-bank accounts, or community initiatives as relevant
Publishing	Optionally published to: public profile · Marketplace listing · community space · external shareable link · email send
Analytics	View, download, share, and conversion events tracked per artifact; surfaced on portfolio and tool dashboards
Version History	All prior versions retained; diff view between versions; restore to any version
Collaboration	Multi-user editing with contribution attribution; comment and review workflow; e-signature integration

8.2 Engine Integrations

Engine	Tools That Use It	Capability Provided
AnalyticsEngine	T-01, T-10, T-11, T-21	Portfolio analytics for auto-populating achievement metrics and invoice analytics
PersonalizationEngine	All tools	Persona-aware tone calibration, field pre-population, and template recommendation
MatchEngine	T-01, T-06, T-20, T-22	Market rate benchmarking, opportunity matching, and skills-to-demand alignment
RecommendationEngine	T-19, T-20, T-22	Opportunity feed personalization, development path recommendations
SearchEngine	T-01, T-05, T-12	Skill and keyword indexing; ATS optimization; grant discovery
GrantEngine	T-12	Grant registry matching, eligibility scoring, impact tracking

Engine	Tools That Use It	Capability Provided
CRMEngine	T-05, T-08, T-10, T-22	Pipeline sync, lead scoring, proposal tracking, invoice reconciliation
RiskEngine	T-05, T-07, T-12, T-16	Risk register generation, scope risk detection, grant viability scoring
CollaborationEngine	T-13, T-15, T-16, T-17	Multi-party document editing, contribution attribution, retro synthesis
OptimizationEngine	T-06, T-14, T-20	Rate optimization, OKR ambition calibration, career path scenario modeling
DataStreamingEngine	T-10, T-11, T-21	Real-time income tracking, content analytics feeds, invoice event triggers
CrowdfundingEngine	T-18	Cap table modeling, Reg CF compliance, investor matching, escrow automation
BenefitsEngine	T-11	Benefits contribution tracking, tax-advantaged account optimization
BookingEngine	T-08, T-09, T-10	Booking lifecycle integration with contract and invoice automation

8.3 Template & Asset Library

Every tool draws from and contributes to the Kogi Template Library — a versioned, community-contributed catalog of document templates, clause libraries, design assets, and generation prompts.

Library Component	Description
Document Templates	30+ resume templates · 20+ proposal layouts · 15+ contract types · 10+ pitch deck formats · 8+ press kit layouts
Clause Library	300+ contract clauses by type and jurisdiction; community-tagged; Oba-curated for clarity and completeness
Achievement Phrases	STAR-format achievement phrase bank organized by skill domain and impact type; used by resume and bio tools
Brand Starters	10+ brand voice profiles by persona type; color palette starters; typography pairings
Prompt Templates	Curated Oba prompt templates for each tool; community-improvable; A/B tested for output quality
Community Contributions	Members share improved templates back to the library; steward-reviewed; attribution credited to contributor

9. Tool Catalog Summary

ID	Tool	Primary Users	Key Integration
T-01	Resume & Portfolio Highlights Builder	All workers, creatives, professionals	Portfolio System · AnalyticsEngine · MatchEngine
T-02	Bio & Elevator Pitch Generator	All users	Profile · PersonalizationEngine
T-03	Press Kit Builder	Artists, creatives, public figures, orgs	Portfolio Artifacts · CRM
T-04	Brand Kit & Social Media Kit	Freelancers, entrepreneurs, orgs	Profile · Content Calendar · Publishing
T-05	Proposal & Pitch Deck Generator	Freelancers, consultants, entrepreneurs	CRM · Portfolio · kogi-bank · Contract (T-09)
T-06	Rate & Pricing Calculator	All workers	MatchEngine · kogi-bank Income Data
T-07	Scope of Work Builder	Freelancers, consultants, service providers	Contracts (T-09) · Work Management Backlog
T-08	Client Onboarding Toolkit	All service workers	CRM · Contracts · Invoicing · Portfolio Space
T-09	Contract Template Generator	All workers and orgs	kogi-bank · e-Signature · Portfolio EventLog
T-10	Invoice & Payment Builder	All workers	kogi-bank Ledgers · CRM · Contract (T-09)
T-11	Tax & Income Estimator	All self-employed workers	kogi-bank · BenefitsEngine · Portable Benefits
T-12	Grant Application Builder	Workers, collectives, cooperatives, orgs	GrantEngine · Portfolio · kogi-bank Grants
T-13	Project Brief & Charter Generator	Project managers, teams, orgs	Work Management WBS · Portfolio · RiskEngine
